

Information Architecture

1. Purpose

The Information Architecture defines the structure of the Sanatan Dharma platform.

Its purpose is to make sure users can easily:

- Understand what the website offers
- Find trustworthy information
- Learn in a structured sequence
- Browse scriptures
- Explore deities, festivals, mantras, and concepts
- Ask questions using AI
- Save and revisit useful content
- Switch between English and Hindi

The website should be simple enough for beginners while still allowing deeper exploration.

2. Primary Navigation

The main navigation should be:

Home

Learn

Scriptures

Deities

Mantras

Festivals

Ask Dharma

Search

My Library

Profile

For desktop, these can appear in the top navigation.

For mobile, they should appear inside a menu or bottom navigation where appropriate.

3. Recommended Navigation Priority

Not every item should receive equal visual importance.

The highest-priority navigation items should be:

1. Learn
2. Scriptures
3. Ask Dharma
4. Search

Secondary navigation:

- Deities
- Mantras
- Festivals
- My Library
- Profile

This prioritization keeps the website focused on learning instead of becoming a generic content directory.

4. Sitemap Overview

The high-level sitemap should be:

Home

Learn

- ├ Start Here
- ├ Sanatan Dharma
- ├ Core Concepts
- ├ Paths of Yoga
- ├ Philosophies
- ├ Traditions
- └ Learning Paths

Scriptures

- ├ Bhagavad Gita
- └ Vedas

- └─ Upanishads
- └─ Ramayana
- └─ Mahabharata
- └─ Puranas
- └─ Other Texts

Deities

- └─ Shiva
- └─ Vishnu
- └─ Krishna
- └─ Rama
- └─ Devi
- └─ Ganesha
- └─ Hanuman
- └─ Others

Mantras

- └─ Popular Mantras
- └─ Deity Mantras
- └─ Stotras
- └─ Shlokas
- └─ Categories

Festivals

- └─ Upcoming Festivals
- └─ Major Festivals
- └─ Monthly Calendar
- └─ Festival Details

- └─ Learning Progress

Profile

- └─ Account
- └─ Language

5. Home Page Architecture

The homepage should answer three questions quickly:

What is this website?

Why should I trust it?

Where should I start?

Recommended homepage structure:

Section 1 — Hero

Headline example:

Understand Sanatan Dharma from trusted sources.

Supporting text:

Learn scriptures, philosophy, traditions, mantras, festivals, and spiritual concepts in simple English and Hindi.

Primary button:

Start Learning

Secondary button:

Ask Dharma

Search bar:

What do you want to understand?

Examples:

- What is Karma?
- Explain Bhagavad Gita 2.47

- Who is Shiva?
 - What is Moksha?
-

Section 2 — Start Your Journey

Cards:

New to Sanatan Dharma

Start from the fundamentals.

Explore Bhagavad Gita

Read and understand the Gita.

Explore Scriptures

Discover major Sanatan texts.

Ask a Question

Use the AI Dharma Assistant.

Section 3 — Core Concepts

Display beginner concepts such as:

- Dharma
- Karma
- Atman
- Brahman
- Samsara
- Moksha
- Maya
- Bhakti
- Yoga

Users should be able to tap a concept and open its detailed page.

Section 4 — Featured Scripture

Example:

Explore Bhagavad Gita

Short introduction.

Button:

Read Bhagavad Gita

Section 5 — Daily Shloka

Show one selected verse.

Include:

- Sanskrit
- Transliteration
- English or Hindi meaning
- View explanation

This feature can become personalized later.

Section 6 — Explore Sanatan Dharma

Cards:

- Scriptures
 - Deities
 - Mantras
 - Festivals
 - Philosophy
 - Traditions
-

Section 7 — Upcoming Festival

Example card:

Festival name

Date

Short description

Button:

Learn More

Section 8 — Ask Dharma

Prompt:

Have a question about Sanatan Dharma?

Input box.

Examples:

- What does Dharma really mean?
 - Why is Krishna called Bhagavan?
 - What is Advaita Vedanta?
-

Section 9 — Trust and Sources

Explain briefly that content is:

- Source-based
- Reviewed
- Transparent
- Respectful of different traditions

Button:

How We Verify Content

This is important for building trust.

6. Learn Section

The Learn section is one of the most important parts of the platform.

It should provide structured learning instead of random articles.

Main page:

Learn Sanatan Dharma

Recommended categories:

Start Here

For complete beginners.

Topics:

- What is Sanatan Dharma?
- What does Hindu mean?
- What is Dharma?
- What is Karma?
- What is Atman?
- What is Brahman?
- What is Samsara?
- What is Moksha?

7. Core Concepts

Main structure:

Core Concepts

- ├ Dharma
- ├ Karma
- ├ Atman
- ├ Brahman
- ├ Moksha
- ├ Samsara
- ├ Maya
- ├ Ahimsa
- ├ Bhakti
- ├ Jnana
- ├ Karma Yoga
- ├ Meditation
- ├ Puja
- └ Yoga

Each concept should have its own page.

8. Concept Page Architecture

Example:

Karma

Page structure:

Title

Karma

Simple Explanation

Explain the concept in simple language.

Meaning

Sanskrit meaning and context.

Deeper Explanation

More detailed understanding.

Scriptural References

Relevant verses or texts.

Different Interpretations

Where traditions differ.

Common Misunderstandings

Example:

“Karma does not simply mean punishment.”

Related Concepts

- Dharma
- Karma Yoga
- Samsara

- Moksha

Ask Dharma

Button:

Ask a question about Karma

Sources

List references.

9. Learning Paths

Learning paths should guide users in sequence.

Recommended V1 learning paths:

Beginner Path

1. What is Sanatan Dharma?
 2. Dharma
 3. Karma
 4. Atman
 5. Brahman
 6. Samsara
 7. Moksha
 8. Yoga
 9. Bhakti
 10. Introduction to Bhagavad Gita
-

Bhagavad Gita Beginner Path

1. What is Bhagavad Gita?
2. Background of Mahabharata
3. Who is Arjuna?
4. Who is Krishna?
5. Why does Arjuna refuse to fight?
6. Karma Yoga
7. Jnana Yoga
8. Bhakti Yoga
9. Dharma

10. Scriptures Main Page

Main route:

/scriptures

Categories:

Itihasa

- Ramayana
- Mahabharata

Shruti

- Vedas
- Upanishads

Smriti and Other Literature

- Bhagavad Gita
- Puranas
- Dharma texts
- Other works

The classifications should be explained carefully and accurately.

11. Bhagavad Gita Architecture

Recommended hierarchy:

```
Scriptures
→ Bhagavad Gita
→ Chapter
→ Verse
```

Example route:

```
/scriptures/bhagavad-gita/chapter-2/verse-47
```

12. Bhagavad Gita Main Page

Content:

- Introduction
 - Historical/literary context
 - Number of chapters
 - Number of verses
 - Main teachings
 - Chapter list
 - How to read the Gita
 - Available translations
 - Available commentaries
-

13. Chapter Page

Example:

Chapter 2 — Sankhya Yoga

Content:

- Chapter title
- Sanskrit title
- Simple summary
- Key teachings
- Verse list
- Important concepts
- Related learning content

Each verse should be individually clickable.

14. Verse Page

Example:

Bhagavad Gita 2.47

Recommended structure:

Reference

Bhagavad Gita 2.47

Sanskrit

Original Sanskrit verse.

Transliteration

Roman transliteration.

Word-by-Word Meaning

Individual Sanskrit words and meanings.

English Translation

Trusted English translation.

Hindi Translation

Trusted Hindi translation.

Simple Explanation

Beginner-friendly explanation.

Commentary

Traditional commentary.

Commentator clearly identified.

Interpretation Comparison

Future feature:

Compare different commentators.

Related Concepts

Examples:

- Karma
- Karma Yoga
- Attachment
- Dharma

Previous / Next Verse

Navigation.

Bookmark

Save verse.

Ask Dharma

"Ask about this verse."

Sources

All relevant sources.

15. Other Scripture Pages

For V1, texts other than Bhagavad Gita can initially have overview pages.

Example:

Upanishads

Page structure:

- What are the Upanishads?
- Where they fit in Vedic literature
- Major themes
- Principal Upanishads
- Important concepts
- Recommended texts for beginners
- Related learning material

Later, individual texts can receive full verse-level structures.

16. Deities Section

Main route:

/deities

Main page should allow browsing by major deity.

Categories may include:

- Shiva
- Vishnu
- Devi
- Ganesha
- Surya
- Hanuman
- Kartikeya

Related manifestations or forms can be nested carefully.

17. Deity Detail Page

Example:

Shiva

Structure:

Introduction

Who Shiva is.

Name and Meaning

Meaning of relevant Sanskrit names.

Iconography

Symbols and visual attributes.

Scriptural References

Texts where Shiva appears.

Philosophical Significance

Different traditions may explain Shiva differently.

Important Forms

Where appropriate.

Related Stories

Stories clearly tied to sources.

Associated Mantras

Related mantra pages.

Festivals

Example:

Maha Shivaratri.

Temples

Future feature.

Traditions

Example:

Shaiva traditions.

Sources

Reference material.

18. Mantras Architecture

Main route:

/mantras

Categories:

Mantras

- └ Popular
- └ Shiva
- └ Vishnu
- └ Krishna
- └ Rama
- └ Devi
- └ Ganesha
- └ Hanuman
- └ Vedic
- └ Peace
- └ Meditation
- └ Stotras

19. Mantra Page

Structure:

Mantra Name

Sanskrit

Transliteration

Pronunciation

Text initially.

Audio later.

English Meaning

Hindi Meaning

Context

Explain where the mantra comes from.

Source

Scripture or traditional source.

Traditional Usage

Explain respectfully.

Important Note

Avoid making unsupported promises such as:

“Chant this 21 times and you will become rich.”

Claims should be grounded in reliable traditions and sources.

Related Content

- Deity
- Scripture
- Festival
- Related mantra

20. Festivals Architecture

Main route:

/festivals

Main page:

Upcoming

Festivals approaching soon.

Major Festivals

Cards such as:

- Diwali
- Holi
- Navratri
- Janmashtami
- Maha Shivaratri
- Ram Navami
- Ganesh Chaturthi

Browse by Month

Optional V1 or later feature.

21. Festival Detail Page

Example:

Diwali

Structure:

Overview

Date

Dates may vary depending on calendar calculations.

Meaning

Why It Is Celebrated

Associated Stories

Different traditions or regions may have different explanations.

Scriptural Connections

Where applicable.

Common Practices

Regional Variations

Spiritual Significance

Related Deities

Related Scriptures

Frequently Asked Questions

Sources

22. Ask Dharma Architecture

Main route:

/ask

This should feel like a specialized learning assistant rather than a generic chatbot.

Main interface:

Ask Dharma

[What would you like to understand?]

Suggested questions:

- What is Dharma?
- Explain Bhagavad Gita 2.47
- What is the difference between Atman and Brahman?
- Why is Diwali celebrated?

23. AI Conversation Structure

AI answers can contain interactive sections:

Answer

Scripture

Explanation

Different Views

Sources

Related Questions

Example:

User:

"What is Moksha?"

AI:

Short explanation.

Then:

Read about Moksha

Bhagavad Gita references

Difference between Moksha and Nirvana

Ask another question

24. AI Context-Aware Pages

If a user asks AI from a verse page:

Ask about Bhagavad Gita 2.47

The AI should already know which verse the user is viewing.

If the user asks from a deity page:

Ask about Shiva

the page context should automatically be available to the AI.

This will provide a much better experience than a separate generic chatbot.

25. Global Search Architecture

Search should be available from every page.

Search types:

- Concepts
- Scriptures
- Verses
- Deities
- Mantras
- Festivals
- Learning content

Example:

Search:

Krishna

Results:

Deity
Krishna

Scripture
Bhagavad Gita

Concept
Bhakti

Verse
Bhagavad Gita 4.7

Festival
Janmashtami

Mantra
Hare Krishna Mahamantra

26. Search Result Filters

Future or V1 depending on complexity:

- All
- Scriptures
- Verses
- Concepts
- Deities
- Mantras
- Festivals

27. My Library

Main route:

/library

Requires login.

Sections:

Bookmarks

All saved items.

Saved Verses

Saved Mantras

Saved Articles

Reading History

Continue Learning

Learning Progress

This becomes the user's personal learning area.

28. User Profile

Main route:

/profile

Sections:

Account

Name

Email

Profile picture

Language

English

Hindi

Potential future languages.

Content Preferences

Optional future feature.

Notifications

Future feature.

Privacy

Account-related controls.

Logout

29. Language Architecture

The website should have a global language selector.

Example:

EN | हिन्दी

A user should be able to switch languages without returning to the homepage.

Example:

English:

```
/learn/karma
```

Hindi may use a locale structure such as:

```
/hi/learn/karma
```

The exact URL architecture will be finalized in the technical document.

30. Breadcrumb Navigation

Deep pages should use breadcrumbs.

Example:

```
Home  
> Scriptures  
> Bhagavad Gita  
> Chapter 2  
> Verse 47
```

This helps users understand where they are.

31. Related Content System

One of the most important architecture features should be connections between content.

Example:

User reads:

Karma

The page should link to:

- Karma Yoga
- Bhagavad Gita 2.47
- Dharma
- Samsara
- Moksha
- Bhagavad Gita learning path

This makes the website function like a knowledge network rather than separate articles.

32. Content Relationship Model

Conceptually:

```
Concept
  ↓
Scripture
  ↓
Verse
  ↓
Deity
  ↓
Mantra
  ↓
Festival
  ↓
Tradition
  ↓
Learning Path
```

These content types should be interconnected.

Example:

Krishna

Connected with:

- Bhagavad Gita
- Mahabharata
- Bhakti
- Janmashtami
- Krishna mantras

- Vaishnavism
 - Related verses
-

33. Content Tags

Every content item may have internal tags.

Example:

Bhagavad Gita 2.47:

```
karma
karma-yoga
action
attachment
dharma
bhagavad-gita
krishna
arjuna
```

Tags can support:

- Search
 - Related content
 - Recommendations
 - AI retrieval
-

34. Trust Architecture

Every important educational page should display trust information.

Possible indicators:

Verified Source

Scriptural Reference

Reviewed Content

Users should be able to open a source panel showing:

- Scripture
 - Translation
 - Commentary
 - Publisher/source
 - Reviewer
 - Last reviewed date
-

35. Source Page

Future route:

/sources

Users should be able to understand:

- What sources are used
- How translations are selected
- How content is reviewed
- How different traditions are represented
- How AI answers are generated

This will help distinguish the platform from unreliable religious-content websites.

36. Footer Architecture

Footer should include:

Explore

- Learn
- Scriptures
- Deities
- Mantras
- Festivals

Platform

- Ask Dharma
- Search
- My Library

About

- About Us
- Our Mission
- Content Policy
- Source Policy

Legal

- Privacy Policy
- Terms
- Copyright

Language

- English
 - हिन्दी
-

37. Authentication Flow

Anonymous users should still be able to access the majority of educational content.

Login should only be required for personalized features.

Example:

Anonymous user:

Reads Gita verse

↓

Clicks Bookmark

↓

Prompt:

Create an account to save this verse.

↓

Google / Email / Apple

↓

Returns to same verse

↓

Verse saved

This avoids forcing users to create an account before understanding the product.

38. First-Time User Journey

A beginner enters the website.

Home

↓

I am new to Sanatan Dharma

↓

Start Here

↓

What is Sanatan Dharma?

↓

Dharma

↓

Karma

↓

Atman

↓

Related Bhagavad Gita verse

↓

Ask Dharma

↓

Save verse

↓

Create account

↓

Continue learning

This should be one of the main product journeys.

39. Returning User Journey

Login

↓

Dashboard / My Library

↓

Continue Learning

↓

Next lesson

↓

Related scripture

↓

Ask question

↓

40. Search-First User Journey

Some users will arrive from Google.

Example:

Google search:

“What is Karma in Hinduism?”

↓

Karma page

↓

Simple explanation

↓

Scriptural sources

↓

Related Gita verses

↓

Start beginner learning path

↓

Ask Dharma

This means each educational page must work well even if the user has never visited the homepage.

41. Scripture-First User Journey

Example:

User searches:

"Bhagavad Gita 2.47"

Verse page

Reads verse

Views explanation

Reads commentary

Explores Karma Yoga

Asks Dharma

Bookmarks verse

42. Mobile Navigation

Recommended mobile bottom navigation:

Home

Learn

Search

Ask

Library

Everything else can be accessed through the main menu.

This keeps high-frequency actions easily accessible.

43. Desktop Navigation

Recommended desktop header:

Logo
Learn
Scriptures
Explore ▼
Ask Dharma
[Search]
Language
Library
Profile

Explore menu:

Deities
Mantras
Festivals
Traditions
Philosophy

This prevents the top navigation from becoming overcrowded.

44. V1 Required Pages

For the first usable version, the essential page templates are:

1. Homepage
2. Learn landing page
3. Learning path page
4. Concept page
5. Scriptures landing page
6. Bhagavad Gita page
7. Gita chapter page
8. Gita verse page
9. Scripture overview page
10. Deities landing page
11. Deity detail page
12. Mantras landing page
13. Mantra detail page
14. Festivals landing page
15. Festival detail page
16. Ask Dharma page
17. Search page
18. Login / Signup
19. My Library
20. Profile
21. About
22. Source Policy
23. Privacy Policy
24. Terms

45. V1 Content Recommendation

Do not launch the website with empty categories everywhere.

A better starting content set could be:

Learn

10–20 high-quality beginner concepts.

Bhagavad Gita

At minimum:

- Full chapter list
- Chapter summaries
- Selected important verses

Then expand toward complete verse coverage.

Deities

Start with approximately:

- Shiva
- Vishnu
- Krishna
- Rama
- Devi
- Ganesha
- Hanuman

Mantras

Start with 10–20 carefully verified mantras.

Festivals

Start with major Indian festivals.

This provides enough content to demonstrate the full product without trying to complete the entire knowledge base before launch.

46. V1 Information Architecture Summary

```
HOME
|
├── LEARN
|   ├── Start Here
|   ├── Concepts
|   └── Learning Paths
|
└── SCRIPTURES
```

47. Architecture Principle

The platform should not behave like Wikipedia with disconnected pages.

It should behave like a **guided knowledge network**.

A user should be able to move naturally from:

Question → Explanation → Scripture → Verse → Concept → Tradition → Related learning

without becoming lost.

This interconnected structure should become one of the core strengths of the product.

48. Status

Information Architecture:

Initial Version Complete

Major areas defined:

- Main navigation
- Sitemap
- Learning system
- Scripture hierarchy
- Bhagavad Gita structure
- Deities
- Mantras
- Festivals
- AI
- Search
- Accounts
- My Library
- Content relationships
- Mobile navigation
- Desktop navigation

The next major planning document should define how religious information is selected, sourced, translated, reviewed, and used by the AI.
